

# LIGHTHOUSE PRO XLS™

## Power Expansion Bar

### Instructions

1. Attach the 10 foot power cord to a wall outlet.
2. Attach the 3 foot power cord to an outlet on the Lighthouse Pro Power Bar.
3. Program the outlet using the Lighthouse Pro as usual. Plug your high powered appliances into one of the 4 outlets.

### Notes

MAXIMUM total power for all outlets is:

- Resistive: (Heaters) 2,500 Watts
- Reactive: (Ballasts) 1,000 Watts
- Inductive: (Motors/Chillers) 1 HP

All outlets are tied together and come On/Off simultaneously. It is recommended that the 10 foot Power Expansion Bar be plugged into a dedicated 15 Amp line from the service panel. Do not exceed 15 amps total. The circuit breaker will trip if power is exceeded. To reset the circuit breaker, push to breaker switch up until it clicks back in place.

**WARNING:** Dangerous, Hazardous voltages inside. Do Not Open. Opening void warranty.
